

MOHAMMAD HAMMAD

Software Developer At Infosys

+91-7409954305 hammad.scripted@gmail.com GitHub LinkedIn LeetCode Amroha, India

PROFESSIONAL SUMMARY

Full-stack developer with over 1 year of experience in building **RESTful APIs**, **real-time applications**, and **responsive frontends** using Node.js, Express, React, MongoDB, Java, and Spring Boot. Proficient in designing backend architecture with **JWT authentication**, role-based access control, and database integrations, while crafting clean, state-managed UIs with modern tools. Passionate about writing maintainable code and enhancing expertise in backend systems, cloud deployments, and scalable design patterns. Eager to contribute to a collaborative team while advancing as an engineer.

WORK EXPERIENCE

Full Stack Developer | Full-time

Feb 2026 - Present

NordStrom - Client

Hybrid • Bangalore, India

- Migrated 1M legacy ID records** in a Postgres pricing database to a new product identifier format by developing a Python script with dry-run mode, rollback capabilities, and backups to ensure **safe production execution**.
- Resolved a 47% record mismatch** resulting from color code discrepancies, increasing match coverage from 53% to 100% by correcting joins and replacing a rate-limited external API with a single SQL join; audited 90 pricing conflicts over 14 months, achieving a **99.6% reduction** in conflicts and documenting remaining defects with prioritized fixes.
- Designed a migration strategy** for the pricing service to a new catalog API using a dual-write approach, enhancing the service proxy with caching, retry logic, and rate limiting, while implementing backward-compatible Avro schema updates to maintain search functionality with mirrored legacy columns.
- Migrated the Flyway/Postgres DB-migration pipeline** from GitLab CI to GitHub Actions, establishing per-environment workflows, Vault secrets management, Artifactory integration, and a ServiceNow change gate for **production deployments**.

Technologies / Skills Used : React, MongoDB, Java, SpringBoot, MySQL, Github, Github Actions

System Engineer | Full-time

Jun 2025 - Dec 2025

Infosys

On-site • Mysore, India

- Generic Training: 2 months**Topics Covered: Java, OOPs, SQL.
- Stream Training: 4 months**Topics Covered: UI development using React.js, API development using Spring Boot and Spring.
- Developed a **FullStack cinema booking web application** that allows users to view recent movies, book tickets for preferred theaters, and includes login, signup, and movie rating features.
- Achieved an overall score of **77% in** the internal final test.

Technologies / Skills Used : Java, SpringBoot, React, MongoDB, MySQL, Spring

PROJECTS

E-Commerce REST API | Website

Individual Project

- Designed and deployed a RESTful API** featuring full authentication via JWT in HTTP-only cookies, **role-based access control**, and product CRUD with Cloudinary image uploads. Implemented a review system with automated rating updates and dynamic pricing calculations for order processing.
- Integrated MongoDB Atlas via Mongoose**, utilizing schema validation, lifecycle hooks, document references, and virtual population, along with centralized error handling through custom error classes.
- Documented the API using Swagger UI** for in-browser testing and deployed it to Render with proper production environment configuration.
- Developed a modular backend architecture** using Node.js and Express, encompassing user management, product handling, reviews, and end-to-end order workflows.

Technologies / Tools Used : Node.js, Express, MongoDB, JWT, Render, Cloudinary, Swagger, Mongoose

Chatty | Website

Individual Project

- Developed a real-time one-to-one chat app** using React, Express.js, MongoDB, and Socket.IO, enabling live message delivery, online/offline presence, and instant UI updates through socket event handling.
- Established secure authentication** with JWT HTTP-only cookies, bcrypt password hashing, protected routes, and persistent sessions, utilizing REST APIs for authentication, profiles, contacts, and message history.
- Coordinated frontend state management with Zustand** for authentication, active conversations, messages, online users, socket connections, and theme preferences, complemented by a responsive UI crafted with Tailwind CSS and DaisyUI.
- Integrated Cloudinary** for profile and chat image uploads, featuring client-side preview and resizing, along with UX enhancements such as skeleton loaders, toast notifications, and mobile sidebar navigation.

Technologies / Tools Used : React, Node.js, MongoDB, Tailwind CSS, Express, Socket.IO, DaisyUI

SKILLS

Databases :	MySQL, MongoDB, Redis, PostgreSQL
Frameworks & Libraries :	React, Next.js, Node.js, Spring Boot, Tailwind CSS, Express.js
Languages :	English, Hindi
Programming Languages :	C++, Java, JavaScript, TypeScript, SQL, C
Soft Skills :	Communication, Leadership, Problem Solving, Critical Thinking, Time Management, Collaboration, Decision Making
Tools & Platforms :	Git, GitHub, Docker, Kubernetes, Postman, Jira, CI/CD, GitHub Actions

EDUCATIONS

NIT DGP | Durgapur, India

Sep 2021 - Jun 2025

B.Tech

CGPA : 7.95

Bachelor of Engineering in Metallurgical & Materials Science Engineering

EXTRA CURRICULAR

Volunteering

Durgapur, India

BMEP

Bihari More Education Project

- General Secretary** - Bihari More Education Project: **Bridged the educational gap** by providing access to quality education and resources for children in need.
- Conducted classes every Saturday and Sunday for **over 50 students**.

Fitness and Wellness

Bangalore

Fitness and Wellness

- Gym and Exercise:** Maintained a consistent fitness routine.
- High Protein Cooking:** Specialized in preparing nutritious, protein-rich meals.
- Cricket and Music:** Actively participated in sports and musical activities.
